This year we celebrate the 90th anniversary of Sehie Park, one of the legendary names in the spread of fixed point theory.

Prof. Park was born on November 28, 1935, in Seoul, Korea. He graduated from Seoul National University (S.N.U.) in 1959 with a bachelor's degree. In 1961, he received his master's degree from the same university. He went to US to receive Ph.D. In 1975, he successfully completed and graduated his doctorate program at Indiana University the USA.

Professor Park is a member of The National Academy of Sciences, Republic of Korea and he is fellow emeritus of The Korean Academy of Science and Technology (KAST) and also he is emeritus professor at Seoul National University, Seoul, Korea.

The main contributions of Professor Park can be listed as Topological methods in nonlinear analysis have many important implications; He has worked on KKM theory, fixed point theory, chance theory, variable inequalities, best approximations and economic equilibrium theory. In particular, he established the fixed point theory for multivalued maps in admissible topological vector spaces and the foundations of KKM theory on abstract convex spaces.

Experiences:

1963-1975 Assistant, Instructor, Assistant Professor, S.N.U.
1970-1971 Head, Department of Mathematics, S.N.U.
1976-1981 Associate Professor, College of Natural Sciences, S.N.U.
1977-1979 Associate Dean, College of Natural Sciences, S.N.U.
1979-1980 Research Associate, Univ. of California, Berkeley, CA
1980- Reviewer, American Mathematical Society
1980-1992 Director, Mathematical Science Research Institute of Korea
1981-2001 Professor, College of Natural Sciences, S.N.U.
1982-1984 President, Korean Mathematical Society (K.M.S.)
1982-1984 Chairman, National Committee of I.M.U.
1992-1993 Visiting Professor, Indiana Univ., Bloomington, IN
