

PREFACE

It is known that scientific research journals and scientific research periodicals usually encourage publication of special issues on specific and popular topics of current research interests. Each of these Special Issues of the *Journal of Nonlinear and Convex Analysis* contains invited and peer-reviewed papers which present comprehensive accounts of the new and state-of-the-art developments on the specific topic: *Big Data and Data Mining Strategies*.

Each of these Special Issues on *Big Data and Data Mining Strategies* contains a carefully-selected, duly-refereed and peer-reviewed collection of articles which provide worthwhile advances in the subjects covered therein.

Finally, as the Guest Editors of these Special Issues of the *Journal of Nonlinear and Convex Analysis*, we take this opportunity to thank all of the participating authors, and the referees and the peer-reviewers, for their *invaluable* contributions toward the remarkable success of these Special Issues on *Big Data and Data Mining Strategies*. We do also greatly appreciate the editorial and managerial help and assistance provided efficiently and generously by Mr. Toshi Takahashi and many of his colleagues and associates in the Editorial Office of the *Journal of Nonlinear and Convex Analysis*.
